A perspective view of the completed LEGO Technic bridge structure. It features two parallel black beams connected by a central black beam, with white beams forming the base. A grey axle with two wheels is attached to the ends of the structure.

A perspective view of the completed LEGO Technic assembly. It features a red 1x4 Technic brick on the left, connected to a black 1x4 Technic brick. The black brick has a red 1x2 Technic brick attached to its right side. The assembly is built on a base of black and white Technic bricks. A black axle with a grey bush is visible on the left side, and a grey bush is visible on the right side.

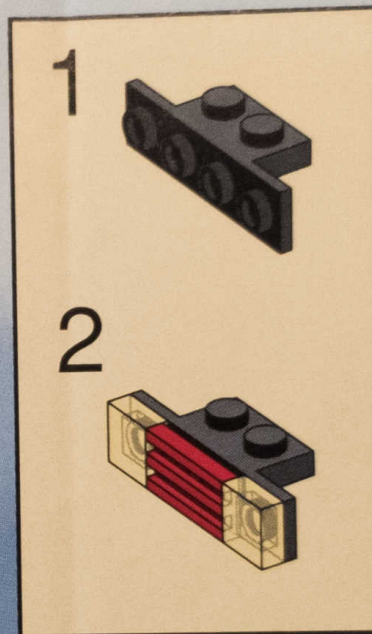

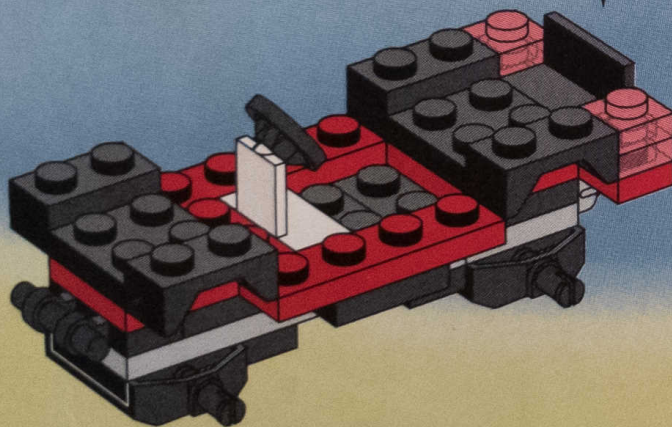

A perspective view of the completed LEGO Technic assembly. The structure is built using red and black Technic bricks and plates. A central grey 3-hole Technic plate is visible, surrounded by red bricks. A black axle is attached to the left side of the assembly. The overall shape is elongated and rectangular, with a complex internal structure of bricks and plates.

This image shows a completed LEGO Technic assembly. It features a red 1x10 Technic plate as the base. On top of this plate, there are several black and grey Technic bricks and connectors. A black axle is visible on the left side, passing through a grey bush and a black connector. The assembly is shown from a perspective view, highlighting its three-dimensional structure.

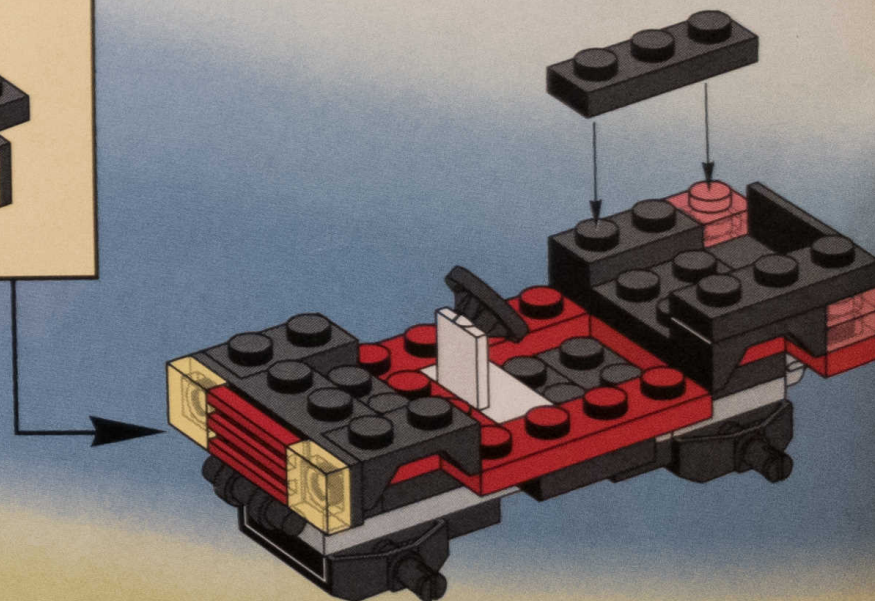

A perspective view of the completed LEGO Technic model. The structure is built using black and red Technic beams and connectors. It features a central black beam with two circular holes, flanked by red beams. The model is assembled with various black Technic connectors, including pins and bushings, and a red Technic pin. The overall design is compact and functional, with a clear focus on the assembly process.
